

Amendment to Training Candidate Selection Requirements

8 October 2024

Mr. Athula Karunanayake
Director General
Department of Meteorology
Bauddhaloka Mawatha, Colombo 07 Sri Lanka

The JICA expert overseeing the training would like to formally request an amendment to the current age criteria of candidates for the upcoming training program.

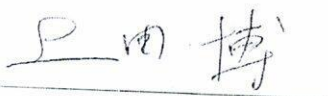

At present, the upper age limit for candidates is set at 40 years old. After thorough consideration and in response to the evolving needs of our program, we propose increasing the age limit to 45 years. This adjustment aims to allow a wider range of experienced professionals to participate, contributing valuable expertise to the training.

The proposed amendment is as follows:

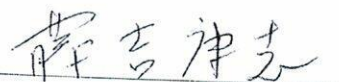

Current Age Limit: 40 years old
Proposed Age Limit: 45 years old

This revision reflects our commitment to ensuring the program benefits from a diverse pool of participants, including those with extensive experience who are eager to enhance their professional skills.

We kindly request that this proposal be reviewed, and we are available to provide any further information or clarification as needed. Upon approval, we are ready to proceed with implementing this change.
